# Connecting to desktop.uib.no from Mac OS X

The assumption is that you have installed the latest version of Microsoft Remote Desktop from the Apple app store. To connect to desktop.uib.no from Mac OS X, follow the steps below.

In Microsoft Remote Desktop, click the plus (+), followed by Desktop, to create a new desktop.
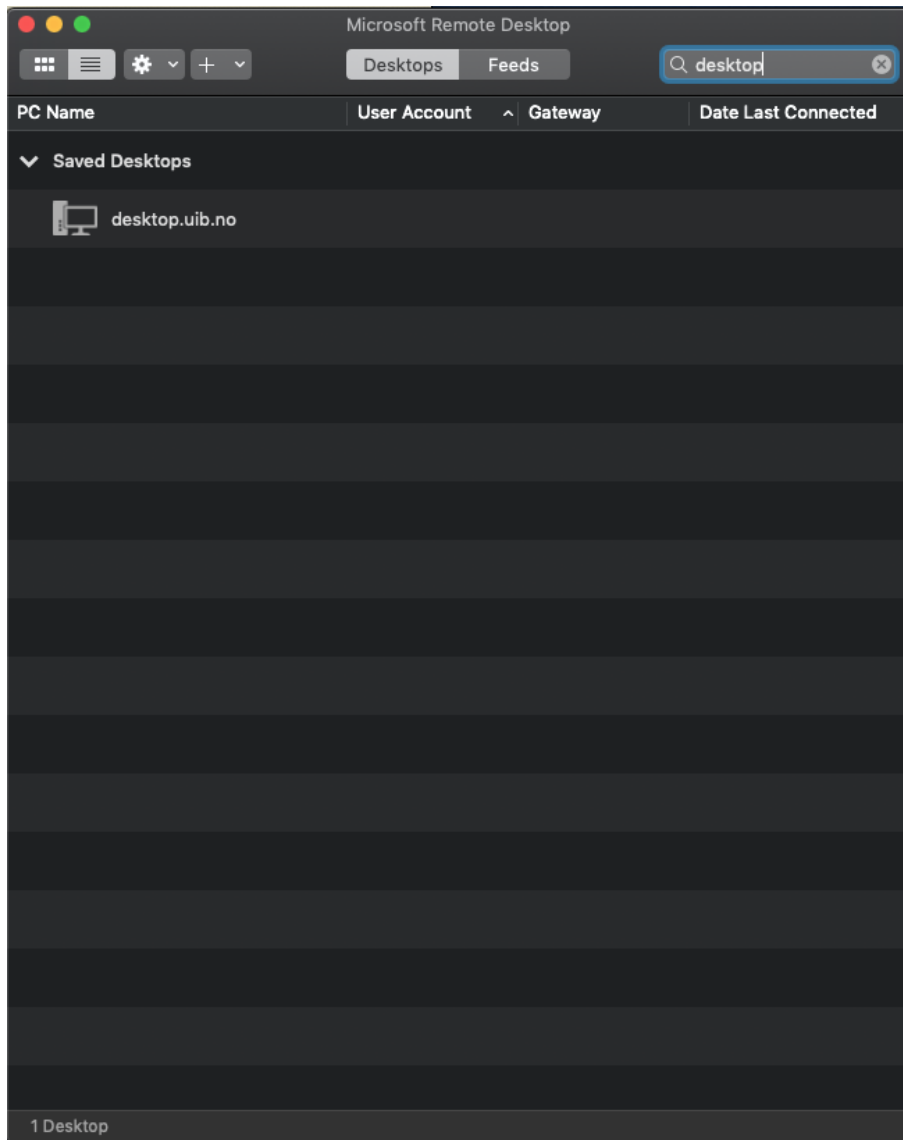

You get the following dialog box:

Enter the name "desktop.uib.no". If you want to set up a user account, you click on "Ask when required" and pick "Add User Account". Remember "uib\" as a prefix before the username.

Click the tab "Devices & Audio" and check the box "Clipboard". This way you will be able to copy/paste between your own Mac and desktop.uib.no.

After you press "Save", You have created a desktop "desktop.uib.no".

To connect to desktop.uib.no, double click "desktop.uib.no"
