Cognitive systems are fundamentally different from what you have today

UNDERSTAND

Adapt and make sense of data; **read** text, **see** images with context **like humans do.**

REASON

Interpret information, organize it, and offer explanations as to what it means, with **rational** for the conclusions.

LEARN

With each data point, interaction and outcome, they develop and sharpen their expertise, so **they never stop learning.**

INTERACT

With abilities to see, talk and hear, Cognitive systems **interact with humans in a natural way.**

Watson has become a set of consumable cognitive services

The Cognitive Solution

Predicting Incidents the following week, for a client in the EPC industry, based on text in incidents reports, weather data and news

Improved customer satisfaction in insurance

- Identification of complaints in 1,20,000 documents per day
- Classification of complaints in four different categories
- Highlighting of the complaint reason
- Recognition of sentiment
- Identification of topics through entity recognition and linguistic models
- Summarization of content
- Manager Dashboards
- Machine learning and word vectors to find synonyms and sub-categories of keywords
- Normalization of waiting times of client cases

Solution

Dear Sir or Madam,

I have resigned my insurance properly. So, it is clear, that my insurance does not persist anymore. Your behaviour is outrageous.

I consider it brazen that you charged me for a contract that does not exist any more you seem to be of the opinion that the contract continues.

Please, cancel the charge immediately. I do not intend any further business with you.

My decision was driven by your behaviour.

I ask you to send me a confirmation to avoid further actions from my side.

Yours faithfully

trigger

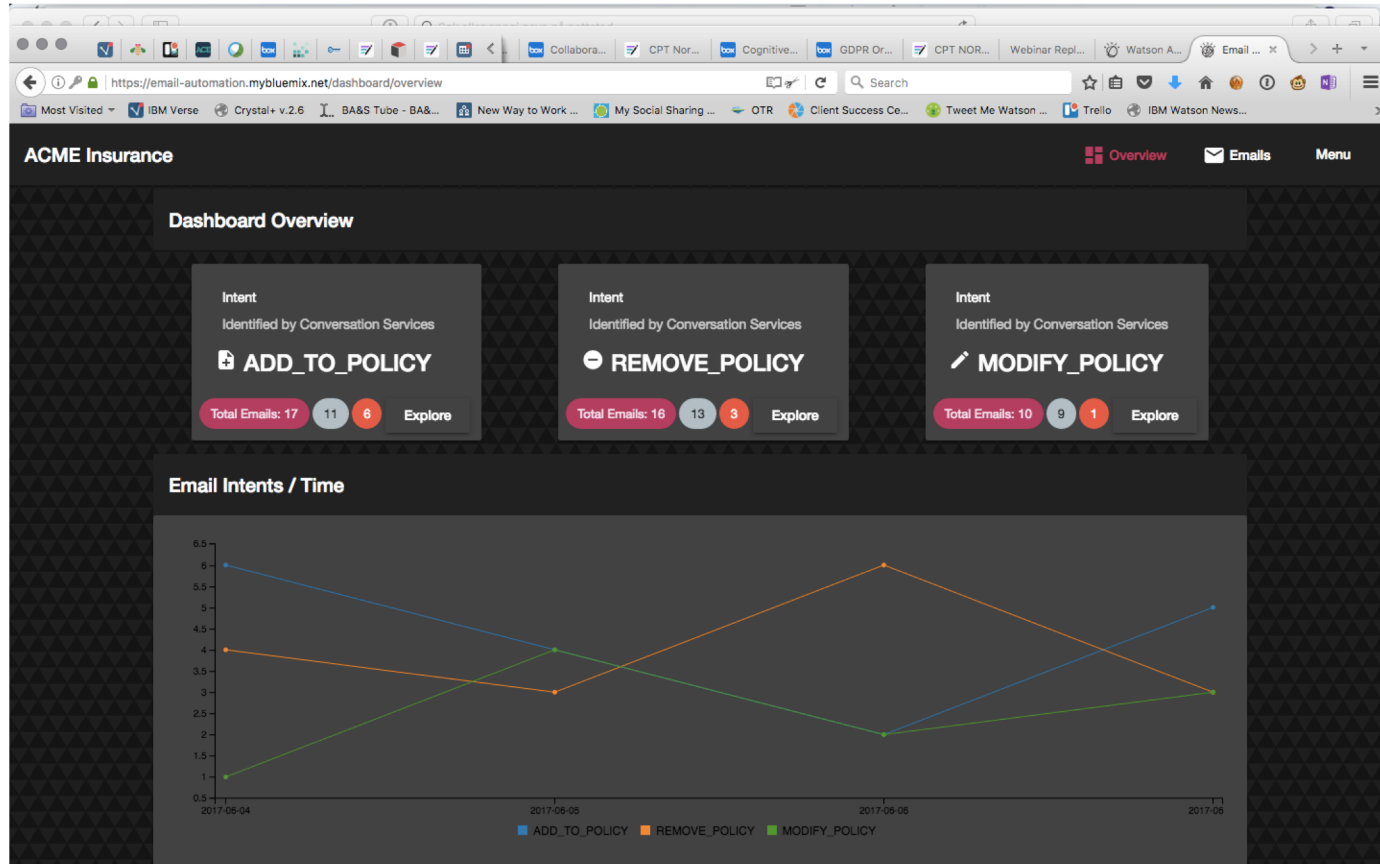

demand

complaint

Recognition of trigger, demand, and complaint (linguistic concept);
Classification and routing (functional concept)

Understanding intent in e-mails and automating process and response, for a bank which was receiving 320 000 e-mails from clients every day

Watson for Education

Need

360° View and Insight

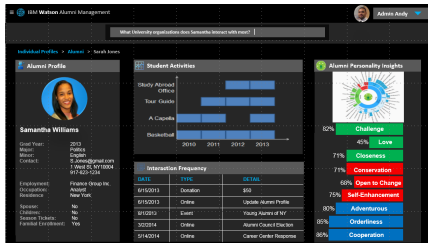

Smarter:

- Admissions
- Student Advising
- Curriculum Development
- Research

Solution

Ask Watson for:

- Access to siloed data
- Analyze & understand data in one place
- Scale Expertise across organization

Student Advisor

- Quality, on-demand access to university information
- Positive brand experience for potential and current students

Ask Watson for:

- Registration information
- Finance information
- Campus information
- Course information

Career Advisor

- Skills and competency assessments for tailored career advice

Ask Watson for:

- Employment info
- Placement programs
- Career affinity
- Internship information

Art of the possible: IBM Watson and Pearson drive cognitive learning for college students

IBM and Pearson are bringing Watson cognitive capabilities to college students and educators

[Read the press release](#)

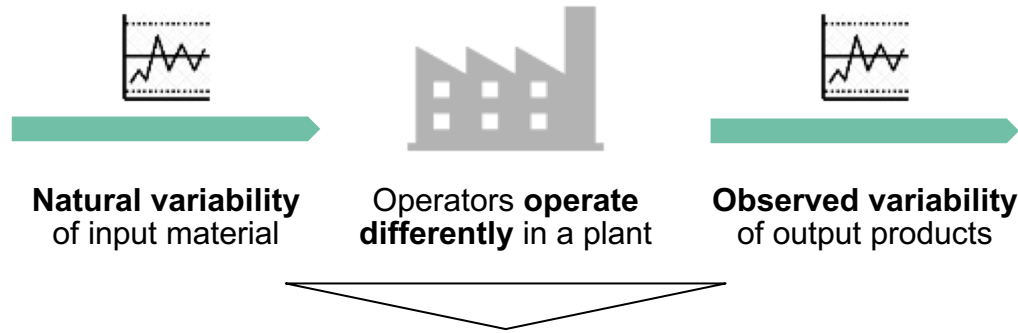

[Watch the video \(01:00\)](#)

Personalized learning is being re-imagined.

The innovative combination of Watson cognitive tutoring capabilities with Pearson's expertise in higher education will help students improve their learning and stay on track to complete their course. When students come to class prepared, and educators have insights provided by Watson, a more impactful classroom experience can occur resulting in better and deeper understanding.

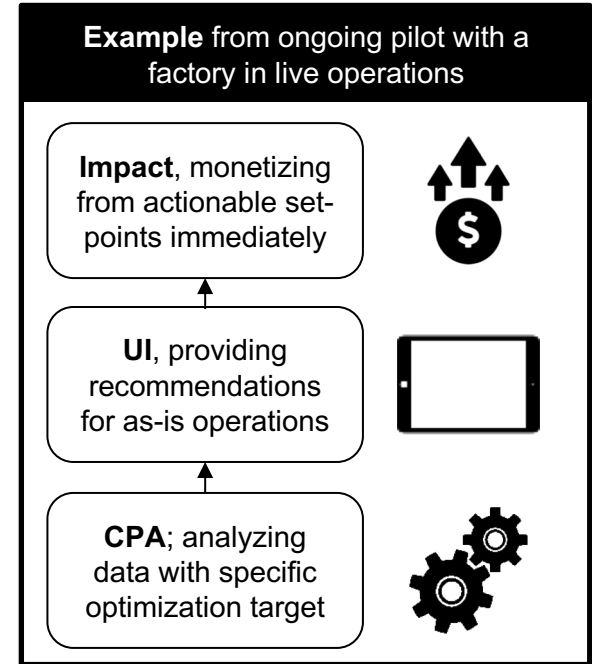

CPA provides actionable set-point recommendations to make every plant operators perform as best-in-class

We see manufacturing plants struggle with **performance variation**, driving an opportunity to improve the OEE

Impacts overall equipment efficiency (OEE)

- *Throughput drives revenue*
- *Efficiency drives cost*
- *Quality drivers revenue and cost*

Cognitive technology can redefine strategy through the closer collaboration between People and Technology

Background

Business Problem

- Millions of news articles are published daily, but this external information is currently not effectively used to consider a business's strategy.
- This can be difficult to consume and digest in order to drive strategy decisions

Solution Concept

- Watson-powered cognitive analytics engine will automatically process the extraction and analysis of data aggregated from over 4000 news sources in over 70 countries across multiple business units
- Analyzed content can be combined with Client's business strategy knowledge to create a cognitive learning engine designed to unlock business opportunities

Title: Honeywell scraps offer to buy United Tech
Date: Feb 29, 2016
Type: Full Text
Source: Yahoo News

By Ankit Ajmera
(Reuters) - Aircraft parts maker Honeywell International Inc said it scrapped its \$90.7 billion offer to buy rival United Technologies Corp, citing the company's unwillingness to engage in negotiations.

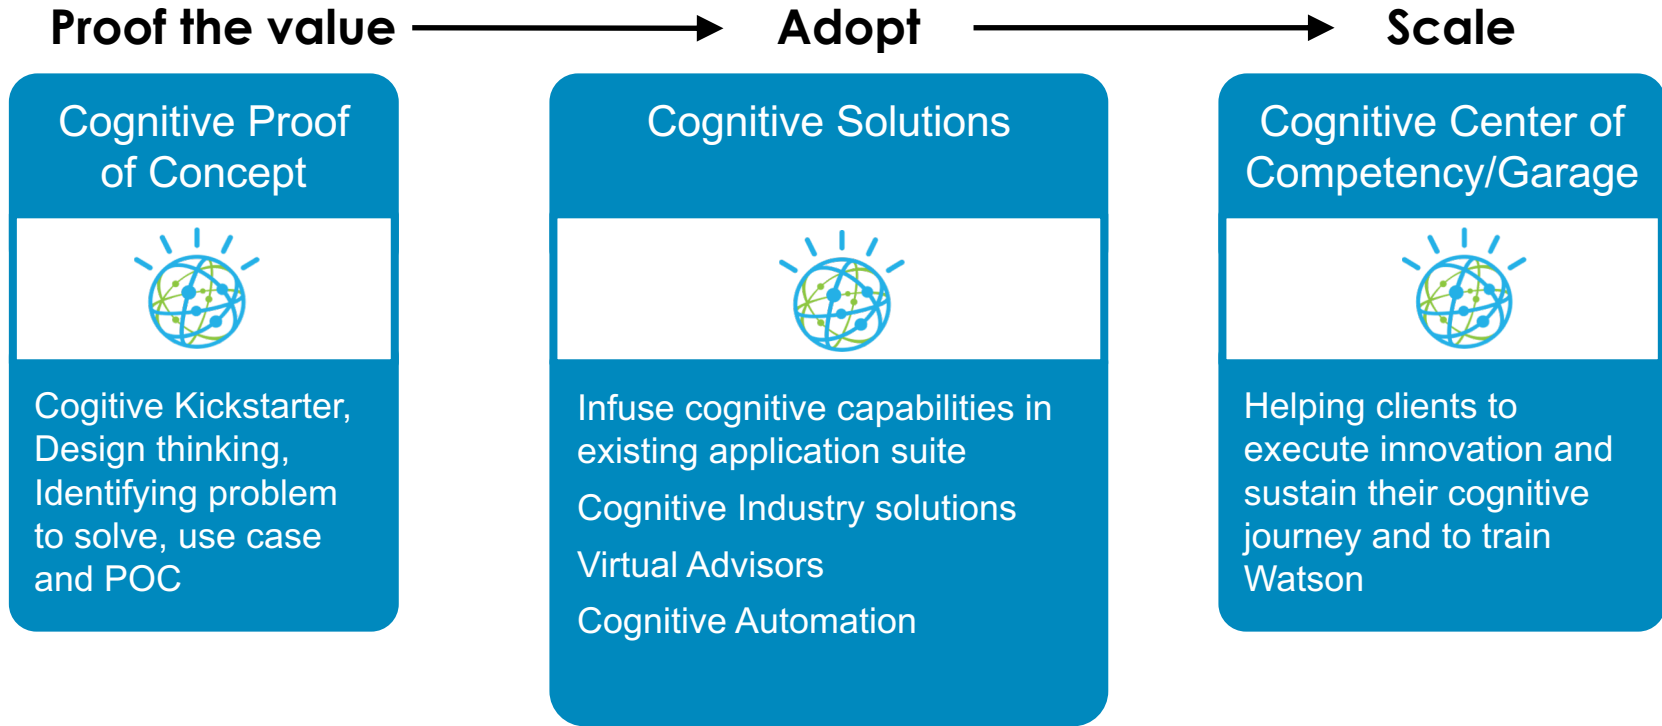

United Tech rejected Honeywell's offer last week, saving a merger would either be blocked outright or any synergies would be far outweighed by regulatory delays, required divestitures and customer concerns.

Shares of United Tech, the maker of Otis elevators, Carrier air conditioners
